

BATHROOM TIPS

Links to Wise Practices and Purchases

Leaking Toilet Tank? Be sure to check the flapper. If the flapper is leaking, it will keep triggering the fill valve to refill the tank. To see if the flapper is leaking, here is a simple test:

- Put a few drops of food coloring in the tank.
- Let it sit for 25 minutes.
- If the color leaks into the toilet bowl, then there's a leak.

Before you replace it, first check the flapper to see if sediment or debris has built up around it. If not, replace it. This is typically a lot cheaper and easier to replace than the fill valve.

Plastic Free Toothbrushes, Zero-waste Dental Floss

Find a plastic-free wooden toothbrush you could just toss in your compost or throw in a campfire once it has served its purpose.
